

## TOP Reduce !

**The newest, material saving, LDPE packaging: contributing to sustainability**

### DESCRIPTION

**TOP Reduce !** is a packaging film made with the latest generation of LDPE raw materials, specially developed to save material in relation to standard LDPE qualities. You can save 20%-40% of packaging material, depending on your product and way of packing.

Together with a substantial advantage in costs, this film also contributes to sustainability. There are less raw materials needed for your packaging. Less packaging means also less waste!

**TOP Reduce !** is printable up to 10 colours (full colour) and can be delivered in every shape you are looking for: bags, tube film, gusseted film, flat film, shrink film (**TOP** shrink !).

### ADVANTAGES / PROPERTIES

#### Material:

- A blend of the latest generation of LDPE granules
- Equal, or even better, processing properties as a conventional LDPE

#### Thickness reduction:

- 20% - 40%, depending on the application
- Tube film: in the past LDPE 100mu now **TOP Reduce !** 60mu
- Crate covers: in the past LDPE 50mu now **TOP Reduce !** 35mu

#### Size:

- from 10cm up to 440cm flat tube film or gusseted tube
- from 16cm up to 440cm lay flat film (folded up to 1000cm)

#### Thickness:

- from 15mu up to 200mu
- clarity depending on film thickness

#### Price:

- Higher blend price, still a lower final product price
- Packaging costs are being substantially reduced

### APPLICATION

- Crate covers, bags, liners
- Shrink film, FFS film, Mailing film
- Tubular film, gusseted film
