

## TopEmBoss<sup>©</sup>

### FILM WITH EMBOSS

#### DESCRIPTION:

EmBossed film is a film that has a visible and tangible pattern: 'EmBoss'. EmBossed film is used as a separation film on sticky substrates. TopEmBoss is also used as a protection film for the adhesive of car windows and safetyglass.

A result of the EmBoss is that the contact surface between the film and the substrate will be reduced and air will be closed in. Because of this, the film is easy to remove.

#### ADVANTAGES/ PROPERTIES :

##### Advantages :

- Prevents sticking together
- Prevents dehydration
- Non-skid
- Effect: for example carrier bags
- Can be applied on almost every film and thickness

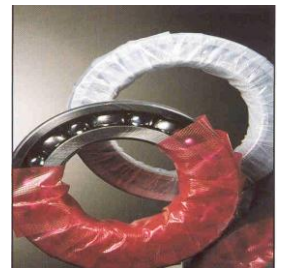

##### EmBoss performances :

- Pyramid
- Diamond
- Textile
- Satin
- Linen

##### Film performances :

- LDPE
- MDPE
- HDPE
- Coex
- Transparent or colored
- Width: 60-200mm
- Thickness: 30-300µm
- Un-printed or printed with 8 colors full color

#### APPLICATIONS:

- Rubber industry
- Production of car tires
- Non-skid implementation
- Glass industry
- Carrier bags
- Pallet sheets
- Printable up to 10 colors full color
